GA Audit Would Reveal Other Counties Much Like Fulton

ATLANTA GA – VoterGA announced today it has evidence election result discrepancies **in other Georgia counties may be worse than those it presented for Fulton County** at a VoterGA [press conference](#) Tuesday. The revelation came as VoterGA formalized its call for a **truly independent**, forensic audit of all county results for the November 3rd, 2020 and January 5th, 2021 elections. VoterGA first announced support for a statewide audit at a July 5th [Woodstock Festival](#) and [Parade](#).

On Tuesday, VoterGA [explained](#) how a review of newly released public documents led them to amend the Fulton complaint to add counts for these audit discrepancies:

- A 60% error rate in the 1500+ batch totals for the reported audit results
- Seven falsified tally sheets containing 850 votes for Joe Biden but 0 for Donald Trump and Jo Jorgenson
- Over 4,000 ballots that were duplicated in reporting of the audit results
- Three days of missing drop box chain of custody forms for over 5,000 ballots
- Missing tally sheets for over 50,000 ballots that were not uploaded until months after the audit results were initially published

According to VoterGA, a full statewide audit of November, 2020 and January, 2021 election results should validate voter eligibility. It must also include forensic authenticity, security assessments, and accuracy verification involving:

- Physical ballots
- Scanner/Tabulators
- Election server images

VoterGA further insisted that any such Georgia audit must be conducted by a **truly independent team that has no relationship with any Georgia officials who conducted the elections**. VoterGA flatly rejected the suggestion by House Speaker David Ralston to engage the Georgia Bureau of Investigation (GBI) stating the GBI:

- Has little or no experience in forensic elections investigations
- Was already engaged with the Secretary of State in voter investigations
- Produces dubious findings in investigations involving government officials

Another [complaint](#) involving the November and January elections, *Daugherty v. Raffensperger*, is expected to have its first [hearing](#) today. [\[Exhibits\]](#)
