

GEORGIA ELECTION AUDIT PETITION

WHEREAS, to have a legitimate, trustworthy and Constitutional electoral process, Georgians must be able to determine the root causes of known problems identified in the November 3rd, 2020 and January 5th, 2021 elections so that solutions can be implemented in time for the 2022 elections;

WHEREAS, four senior poll managers and two audit monitors submitted [sworn affidavits](#) under penalty of perjury stating they saw counterfeit ballots in the Fulton County hand count audit conducted on November 14th-15th 2020;

WHEREAS, Fulton Co. mail-in ballots have still not been publicly inspected for counterfeits which may number into the tens of thousands according to at least one of the affidavits;

WHEREAS, a recent [order](#) to dismiss the Fulton Co. ballot inspection case leaves Georgia voters with no recourse to protect their voting rights against ballot stuffing;

WHEREAS, the recent order to dismiss the case is in direct conflict with [U.S Supreme Court precedents](#) that have already found the right to vote cannot be diluted by ballot box stuffing;

WHEREAS, an appeal to resolve the bogus dismissal of the Fulton Co. ballot inspection case will be not timely enough to identify and provide relief for Georgia voters;

WHEREAS, Georgia’s Dominion voting system is unverifiable to the voter because it accumulates votes hidden in [Quick Response \(QR\) codes](#) that the voter cannot read or verify to ensure they match the printed text;

WHEREAS, a U.S. District Court [order](#) found Georgia’s Dominion voting system violates two election statutes requiring the system to produce an elector verifiable ballot with human readable text [Pg. 81, 82];

WHEREAS, Georgia’s Dominion voting system tabulators malfunctioned in multiple counties during the November 2020 election and thus impacted thousands of votes cast;

WHEREAS, the Dominion voting system has never been forensically evaluated after any of its malfunctions;

WHEREAS, parts or all of the same Dominion voting system that Georgia uses was [rejected in Texas](#) and [banned Colorado](#) before the Georgia Secretary of State purchased it;

WHEREAS, [massive errors and fraud](#) were found in the Fulton Co. Presidential race audit including a 60% batch error rate, falsified tally sheets and thousands of duplicate votes reported in the audit;

WHEREAS, the errors and fraud found in the audit make it impossible for the November 2020 Presidential race audit results to have been used to verify the published election results;

WHEREAS, a U.S. District Court [order](#) found that the office of the Secretary of State is “not credible”;

WHEREAS, dozens of Georgia counties have already destroyed original ballot images and other election records for the November 2020 election, making it impossible to use those images to audit county election results;

WHEREAS, an Arizona [audit results](#) found as many as 50,000 invalid ballots that diluted legitimate votes,

BE IT RESOLVED, that we the undersigned demand the Governor instruct the legislature to evaluate public concerns about November 2020 election integrity problems to restore public trust in Georgia elections;

BE IT RESOLVED, that we the undersigned demand our legislators to conduct a multi-county forensic audit of ballots, election server images and voter eligibility using subpoena powers granted their committees as necessary to resolve known outstanding election integrity problems prior to the 2022 elections [\[O.C.G.A. § 28-1-16\]](#).
