

Dear VoterGA Supporters,

I hope you're having a joyous holiday season and looking forward to a wonderful new year. Thank you so much for walking with me, and the VoterGA team in 2021. This year's efforts would not have been possible without your involvement, ongoing support and generosity—in funding, volunteer efforts, expertise and outreach.

I have been amazed at the **explosive growth** that has transformed VoterGA from a small, Georgia-based, non-partisan organization into a nationally recognized leader. During the past year, our network of volunteers that form our lobbying, litigation, research and outreach teams have combined beautifully to make us into what may be **the best Election Integrity organization in America**.

The journey started with a pencil and notebook that a new volunteer gave me as I was leaving the State Farm Arena on Friday, November 6. You may remember, that was the day Fulton County Elections Director Richard Barron stated that 106,000 of 113,000 Fulton County mail-in ballots had been through the adjudication process. As a tabulation observer, I knew then that Fulton could not have adjudicated that many ballots and even if they had, why would the highly controversial Dominion system have forced 94% of all ballots read into adjudication?

I began signing up dozens of new poll watcher volunteers from the crowd of those gathered there who wanted to “*Stop the Steal*”. Our co-founder, Ricardo Davis built an automated sign-up form that night and we returned to the Capitol the next day to sign up hundreds more. Shortly thereafter, our Election Integrity Coalition partner, the Constitution Party of Georgia (CPGA), began hosting a weekly Election Integrity update Zoom call for VoterGA. **The call continues to this day to keep everyone informed, trained and engaged. It typically attracts about 100 patriots each per week.**

#### OUR 2021 ACCOMPLISHMENTS:

- In November, 2020, I was at the Fulton County hand count audit when senior poll managers and our audit monitors found **counterfeit ballots** included in the election results. After other election-related lawsuits stalled in court, our Attorney Todd Harding used their affidavits to file the Fulton County counterfeit ballot lawsuit in December. From January through May, 2021, **we won a protective order for the ballots, an order to turn over ballot images, a conditional approval to inspect the ballots and an order to unseal the ballots** before the court abruptly dismissed the case. We appealed the decision and fully expect to win the appeal because that court's dismissal violates 100 years of U.S. Supreme Court precedents that protect all voters from ballot box stuffing.
- In April, VoterGA won a case forcing Gwinnett County to turn over ballot images for the August, 2020 runoff. **We also lobbied the legislature successfully to make ballot images a matter of public record in SB202**. When the new law became effective in March, our volunteer teams began collecting and analyzing the original ballot images from the November 2020 election. During that time, news organizations like *One America News Network* and *Real America's Voice* began covering us regularly, and our outreach team started participating in festivals, parades and events to increase our exposure.
- In July, VoterGA announced the results of our Fulton ballot image analysis: a **60% audit batch error rate, 7 falsified tally sheets with 850 to 0 Biden votes, 4,000 duplicate reported ballots and 200+ duplicate scans**. *The Tucker Carlson Show* ran a 10-minute story on our evidence and there were calls for investigations. Governor Brian Kemp eventually picked up the evidence and used it in his 36-point report to the State Election Board asking them to investigate the matter.
- In August, based on demand from our members, **VoterGA sued the state to ban the current Dominion voting system**. Our first hearing was conducted on December 15, where we explained that the U.S. District Court had already found the system violated two Georgia statutes.

- In September, VoterGA organized a bus trip down to Perry, Georgia where I was privileged to speak at a well-attended **Save America Rally**. Our volunteers handed out hundreds of push cards to attendees that day to increase our presence even more. We also began intense lobbying for a multi-county audit as the AuditGaNow billboard campaign began with the first one going up on Highway 316 near Lawrenceville.
- In October, in conjunction with CPGA, VoterGA formalized a comprehensive Poll-watcher training program that turned out over 200 volunteers for the November 2020 and November 2021 general elections. As a result of those efforts, many serious issues were uncovered.
- In November, VoterGA announced the results of our statewide ballot image effort: **70 counties are unable to provide original ballot images for the Nov. 2020 election**. We also found that the former State Elections Director and a State Election Board (SEB) rule authorized destruction of images in violation of federal and state law that requires them to be retained for about two years.
- Later that month, we joined an Election Integrity Coalition to help establish a **statewide Election Integrity support network for next year** and in December, we debuted a *12 Months of Cover-ups* Christmas parody to attract new members who would not otherwise be paying attention.

#### **WHAT NEXT FOR 2022?**

Our lobbying, litigation, research and outreach efforts are stronger now than ever. We plan litigation to hold the state accountable for the destruction of ballot images and counties accountable for failing to comply with our Open Records Requests. Our research team found that there are over 100,000 drop box ballots from the November election results that do not have proper chain of custody forms. It will take more litigation resources to hold the counties or state accountable.

We are organizing a legislative team to lobby aggressively for an audit in the upcoming session and will continue to coordinate an effort to pressure the Governor and other candidates. We will also continue critical efforts to ban the Dominion Democracy Suite 5.5 system as we continue to discover more severe problems that have not yet been revealed.

In closing, we must carry out all of these efforts because we cannot have a secure 2022 election if we can't acknowledge and correct the 2020 election problems. We humbly need your continuing, sustaining tax deductible donations to achieve these objectives that are so sorely needed for Georgia and America in the coming year. The appeals and delays involved in fighting the corrupted Georgia election system will drain our resources if we are not fully equipped to win. We **are grateful** that you and many others have enabled us to keep up the fight in a non-partisan manner. And yet, it grieves me that **other organizations collect money under the guise of "Election Integrity" while we are the actual group doing most of the real work on the "tip of the spear" to save Georgia**. It is an unfair situation, but one that we are overcoming.

I am a **volunteer** and do not take a salary—so your donation is stewarded wisely to achieve our goals. **With your generous help, we will inspect the ballots, conduct an audit, ban the current Dominion system and hold election officials accountable**. I can't thank you enough for the important role you play in our quest to secure our elections in Georgia. I am grateful for your enduring support and look forward to your involvement in the coming year. To volunteer, attend our Election Integrity Update calls, get more details on our accomplishments, or to donate, go to [VoterGA.org](https://VoterGA.org).

Best Wishes in the New Year,

Garland Favorito  
Co-founder
