## **VOTERGA OPENS HEADQUARTERS IN NORTHWEST GEORGIA**

**Ringgold, Georgia, March 31, 2022** - VoterGA today announced the creation of a Northwest Georgia organization and headquarters. The 4,000 square foot headquarters is located in the Cleburne Square Shopping Center at the corner of Legion Street and Lafayette Street near the Courthouse in Ringgold, Georgia.

The purpose of the headquarters is voter education and training, along with opportunities for the people of Northwest Georgia and beyond to understand the intricacies of an electronic voting system—including flaws that need to be rectified. In particular, citizens will be able to sign up and participate in poll worker and poll watcher education and training. Visitors will have access to several instructional videos with surprising information explaining what went wrong in the 2020 election in Fulton County and throughout the State of Georgia.

The public is invited to attend to learn about the history and little known facts of electronic voting. To kick-off this multi-faceted offering, the headquarters will host several events during the month of April. Here's the tentative schedule:

- April 2: Grand opening presentation by VoterGA co-founder Garland Favorito
- April 9: On site poll watcher training with Bridget Thorne and Julie Adams
- April 16: Legal briefing by Trump endorsed Attorney General candidate John Gordon
- April 23: Dinner, music and a special presentation from Garland Favorito

VoterGA events will be scheduled throughout the summer so stay tuned for more.

VoterGA is a non-profit organization started in 2006 years ago by co-founders Garland Favorito and Ricardo Davis of Atlanta, Georgia. Its original mission was to challenge Georgia's previous system as unconstitutional on the grounds that its results were not transparent and could not be verified, audited, or recounted properly. In 2019, the U.S. District Court confirmed VoterGA's contentions by banning the system from future use. Within weeks, the Secretary of State Brad Raffensperger purchased a new computer system from Dominion Voting System even though it had several of the same deficiencies. VoterGA has filed a lawsuit against the state to ban that system as part of its continuing legal, legislative and executive branch efforts to ensure election integrity in Georgia.
