## **VoterGA Tells Raffensperger: Unseal All Ballots or Unplug System**

**ATLANTA, GA, JUNE 28, 2023** – VoterGA announced today that it is calling on Georgia Secretary of State Brad Raffensperger to unplug the Dominion voting system found by expert witness, Dr. Alex Halderman, to have grossly inadequate security controls. VoterGA co-founder, Garland Favorito, released a detailed statement to explain the problem and solutions:

*“The recently unsealed [Halderman Security Analysis](#) explains that **the Dominion voting system was not designed, engineered or tested with the necessary security provisions and cannot be retrofitted to satisfactorily include them.** We, at VoterGA, have whole-heartedly promoted similar viewpoints for years.*

*Secretary Raffensperger has [misled](#) legislators and county election officials by touting an unsigned [Mitre report](#) that was funded by Dominion and produced without access to the voting system. It has been [discredited](#) by 29 experts on grounds the entire report is based on a ‘ridiculous’ false assumption that all necessary physical controls cannot be compromised.*

*No patch will ensure our voting system is secure because **the Secretary continues to fight to keep the paper ballots it produces secret.** Our scanners are as unsecure as the Ballot Marking Devices and more dangerous because they control what is tabulated. The Halderman analysis shows our scanners were set to accept photocopied ballots. [Evidence shows](#) photocopies were scanned and accepted in 2020 and 2022 elections. We also [determined](#) thousands of low-resolution Dominion ballot images were [electronically altered](#) prior to 2020 certification.*

*The obvious [solution](#) to this problem is to **unplug Georgia from the voting system. Voters must cast hand-marked paper ballots on security grade paper, hand counted in public at polling locations.** The Secretary refuses to do this because he purchased **the system. That system is unverifiable to the voter and it was [declared illegal](#) by the U.S. District Court prior to the 2020 election.** [Pg 81-82]*

*If Secretary Raffensperger continues refusing to [unplug](#) this system, the only other solution is to unseal all paper ballots the system has produced and will produce in the future. Publicly available ballots are necessary to verify electronic results and detect counterfeit ballots as soon as results are certified. Therefore, we call upon Secretary Raffensperger to **immediately request Superior Courts statewide to [unseal](#) all paper ballots for the 2020, 2022, and 2024 elections.** Georgians deserves honest proof of secure, [transparent](#) elections.”*

VoterGA is a non-partisan, 501(c)3 registered non-profit organization created by a coalition of citizens working to restore election integrity in Georgia. We advocate for independently verifiable, auditable, recount capable, transparent and tamper proof elections.
