Intelligence Reveals Massive China Election Interference Coverup

ATLANTA, GA. AUGUST 27, 2026 – More [declassified communications](#) released this month confirm those released in July showing **China conducted massive, multi-faceted, U.S. election interference campaigns starting in 2018 or earlier**, mostly against President Trump. Specifically, China and its nation state actors:

1. Breached at least 18 states' voter rolls and 28 U.S. company web sites to mine the Personal Identifying Information (PII) of 220 million U.S. voters;
2. Shipped 20,000 fake U.S. drivers' licenses into the U.S. for invalid 2020 voter registrations;
3. Illegally funneled money to congressional campaigns by using U.S. individuals as conduits;
4. Targeted email accounts of Executive Branch leadership, Congress and the federal judiciary;
5. Imposed tariffs on exports to China for U.S. sectors that favored President Trump;
6. Conducted a massive social media campaign to exploit divisions in U.S. society in a manner that denigrated President Trump;
7. Paid journalists, social media influencers and media contributors to write negative stories critical of President Trump;
8. Offered well-paid speaking engagements to think tank officials, academics, and former U.S. government employees in efforts to force them to lobby President Trump for reduced tariffs on Chinese imports;
9. Applied pressure to financial supporters of President Trump's 2020 reelection campaign to coerce them into withdrawing or reducing their support.

Documents further show **most of the U.S. intelligence community repeatedly denied these activities** and falsely reported in late 2020: “[Beijing has not employed influence efforts...](#)” and “[Beijing did not intend to affect the election.](#)” They also reveal how U.S. intelligence officers admitted to “[...running a shadow government...](#)” and how their reports were “[...deliberately messaged...to avoid any direct links to the election.](#)” VoterGA co-founder Garland Favorito added: “***We have a national election security emergency that President Trump must rectify.***”
